Which printing should you actually buy?

Most spiking oracles have 3–10+ printings ranging from \$2 reprints to \$500+ originals. Buying the wrong version of the right card is the #1 way readers lose money on spike picks. Our Stage-2 model ranks every printing of every pick above (Beta vs Unlimited vs Masters vs modern reprint) and tells subscribers the exact version to acquire.

Notes

Universe covers tracked Magic singles with an entry price of at least \$2 and a minimum of one year of pricing history. "Spike" means a sustained sale price at the listed multiple of the buy price reached within the listed window. Both the broad and the aggressive thresholds are reported per card so you can size positions to your risk preference.

Disclaimer. Forecast probabilities are estimates over a fixed historical regime and assume market conditions stay broadly comparable. Trust the *ranking* of picks more than the raw probability value.
